

ABSTRACT

A wall plug suitable for connecting an item of telecommunications equipment to a telecommunications network, wherein the equipment and the network are separated by a wall, the wall including a bore communicating through the wall, the device comprising a hollow body in the form of a tube engageable in the bore, the tube including termination means to terminate a cable connected to the telecommunications network; and connection means to receive a connector of the item of telecommunications equipment, the termination and connection means being so arranged that with a cable terminated on the termination means, connection of the connector to the connection means provides an interconnection between the equipment and the network.
